

EDUCATION

- **Indian Institute of Technology Ropar** Punjab, India
Bachelor of Engineering in Computer Science; CGPA: 7.06 Aug. 2016 – Present
- **Rajasthan Board of Secondary Education** Kota, Rajasthan
Maths & Science; 85.8% 2016

EXPERIENCE

- **Zomato** Gurgaon, India
SRE Intern May – July 2019
 - Maintained and improved SMS Service, designed template based system and added stats using **prometheus**
 - Revamped the entire codebase for easier extension and scaling of the service
 - Designed a dashboard for admin uses using **React**, **PhP** and **GO**
 - Learned software engineering patterns and some cool tech stuff

PROJECTS

- **COMPETITIVE PROGRAMMING PLATFORM** Django, Docker, Redis, Postgres
 - Designed a competitive programming platform for IIT Ropar with support for multiple programming languages
 - Designed code editor and judge for submission using python and **Docker**
 - Added priority queue using **Celery** and Redis
- **LOCAL AND ONLINE PRICE COMPARISON** Django, Postgres
 - Created a web app on which sellers can post their products, maintain multiple shops
 - Users can compare a particular product's price from different sellers and online store e.g. Amazon
- **MULTIPROCESSOR SIMULATOR** C++
 - Created a multiprocessor simulator for a 16-bit simple RISC isa in C++ by executing operations in circular fashion
 - Added instruction to simple-RISC for parallelism, eg. WFE(wait for event), SEV(send event)
- **FACULTY LEAVE PORTAL** Mongodb, MySql, PhP
 - Created a faculty leave portal with dynamic leave route approval
 - Created dynamic faculty profile page using **mongodb** and php
- **FLAPPY BIRD AI** Neural Network, SVM, pygame
 - Created flappy bird game using pygame
 - Trained gaussian and linear svm for flappy bird game
 - Implemented neural network with genetic algorithm for flappy bird

ABOUT ME

- **Tech Skills**
 - Redis, Docker, Sql, git, Linux, VIM
- **Awards & Honors**
 - Won hackathon at Advitiya IIT Ropar Tech Fest
 - Got selected for KVPY scholarship with All India Rank - 740

MOOCs

- Algorithmic Toolbox, University of California San Diego
- Neural Networks and Deep Learning, Improving Deep Neural Networks by deeplearning.ai
